

## **McDwiff User Guide**

### **July 27, 2011**

#### **About McDwiff**

McDwiff is a Mac OS X viewer for Autodesk DWF files.

McDwiff uses Autodesk's online DWF translator to get 100% fidelity on Mac OS X (10.4 or higher) *This means your DWF files are uploaded to Autodesk's servers when you open them in McDwiff.* If you don't want your DWFs sent over the Internet to Autodesk, don't open them in McDwiff.

#### **System Requirements**

McDwiff is a Universal Binary and requires Mac OS 10.6.6 or later. You also need an active Internet connection to use McDwiff.

#### **Installing McDwiff**

McDwiff is distributed through the Mac App store. Visit <http://macdwf.com> to download.

#### **Opening DWFs**

To open any DWF on your Mac, just double-click on it. Or choose File...Open.

To open a DWF on a remote Web site, chose File...Open Location and enter the entire URL (including http://) into the location field, then click Open.

#### **Navigating**

Click and drag your mouse to pan. Roll your scroll wheel to zoom in and out. Use the Zoom slider at the top of the McDwiff window to see how far you can zoom.

The Page Up and Page Down keys on your keyboard will advance you to the next and previous sheets. The Home key Zooms to fit. The + and - keys also zoom you in and out.

#### **Exporting**

Use File...Export... to convert the DWF file to a variety of common raster image formats including PNG, BMP, GIF, and TIF.

#### **Printing**

Use File...Print to Print to paper or PDF. Use File...Page Setup... to change print options.

#### **Warranty**

McDwiff is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.
